

Activated Carbon Filter Cartridges

Select high quality activated carbon and through multi processes with 300~500°C carbonization treatment. Make carbon to be porous structure. Under 800~1100°C high temperature activation in order to clear reaction products in the pores. The process improves the absorption ability of the activated carbon filter cartridges.

* CCF-Carbon Nonwoven Fabric Filter Cartridges

- Surrounded by high-quality activated carbon nonwoven fabric
- High efficiency and long-term adsorption performance
- Effectively remove residual chlorine, odor and organic chemicals from liquids

Length	Nominal Type: 10, 20, 30, 40 inch High-Flow Large Size: 10, 20 inch
Applications	PCB, Electroplating, Reverse Osmosis Pretreatment, Chemical Processing, General Filtration, Reclaimed Water Treatment
