

Activated Carbon Filter Cartridges

Select high quality activated carbon and through multi processes with 300~500°C carbonization treatment. Make carbon to be porous structure. Under 800~1100°C high temperature activation in order to clear reaction products in the pores. The process improves the absorption ability of the activated carbon filter cartridges.

* GDC-Customized Pleated Carbon Nonwoven Filter Cartridges

- Import American activated carbon fiber to make the carbon filter
- Various connections and sizes can be customized
- Can be produced into pleated and spiral winding styles

Length	Nominal Type: 10, 20, 30, 40 inch High-Flow Large Size: 10, 20 inch
Applications	PCB, Electroplating, Reverse Osmosis Pretreatment, Chemical Processing, General Filtration, Reclaimed Water Treatment
