

High-Flow Pleated Filter Cartridges

- Manufactured by high quality Polyester media. The cartridges exhibit highly effective retention efficiency and reach up to 90%
- Pleated surface results in great filtration area, low pressure drop and high flow capacity, extends service life and makes the cartridge one of the most economic options in water treatment
- Free of additives and binders due to special processing avoid organic releasing and suitable for various filtration systems
- Enable to be washed and reused, saving operation and cleaning cost

Material	Polypropylene, Polyester
Length	5, 10, 20, 30, 40 inch and Customization
Micron Rating	0.5, 1, 5, 10, 20, 30, 50, 100 μ m
End Cap	DOE, 2-222 Flat, 2-222 Fin, 2-226 Flat, 2-226 Fin
Operating Data	Δ P : 3.0 bar at 25°C, 2.4 bar at 50°C
Applications	PCW, Pre RO/DI, Chemical Processing
