

✱ CCP-Carbon Impregnated Cellulose Filter Cartridges

- CCP is made of activated carbon fiber
- The production procedure keeps the carbon powder from releasing
- The performance of petroleum gases, vapors absorption and filtration is excellent ; CCP is usually used in electroplating process

Length

Nominal Type: 10", 20", 30", 40"
High-Flow Large Size: 10", 20"

Applications

PCB, Electroplating, Reverse Osmosis Pretreatment,
Chemical Processing, General Filtration, Reclaimed Water Treatment
