

## CMP Series Melt-Blown Filter Cartridges

- Effectively captures particles and ensures consistent performance through a multi-layer structure
- Depth structure ensures high dirt holding capacity and long service life
- Melt-blowing polymer technology with firmed fibers leads to precision filtration result
- Outstanding efficiency captures the larger CMP slurry particles accurately

|                |                          |
|----------------|--------------------------|
| Material       | Polypropylene            |
| Length         | 10", 20", 30"            |
| Micron Rating  | 1, 3, 5, 7, 9, 11, 13 µm |
| End Cap        | 2-222 Flat               |
| Operating Data | ΔP : 4.8 bar at 25°C     |
| Applications   | CMP Process              |
